I proudly present the 2019 Driver Handbook, which showcases our commitment to well-trained motorists and safer roads for all Coloradans.

Jared Polis  
Governor  
State of Colorado

DON'T DRINK AND DRIVE  
THE HEAT IS ON!  
To report a drunk driver, call CSP (*277) from a cellular phone.  
The call is free and may save lives!

“The Heat is On” is sponsored by the Colorado Department of Transportation and supported by the Colorado State Patrol and law enforcement across the State of Colorado.
INTRODUCTION
The purpose of this Driver Handbook is to provide you with information on how to become a safer driver.

The Driver Handbook is a summary of the laws, rules and safe driving practices that apply to all who drive a vehicle in Colorado. It is based on current laws, legislation and department policies, and is subject to change. It should not be used as a basis for any legal claims or actions. It is a book of information only and does not supersede Colorado Revised Statutes. Traffic regulations in cities, towns, counties and federal territories may go beyond state regulations, as long as they do not conflict with state law. Refer to the Colorado Revised Statutes (C.R.S.) Vehicles and Traffic, Title 42 Common Code book for more information on Colorado motor vehicle laws.

Do not discard this handbook after you have obtained your license; keep it as a reference or pass it on to another applicant.

1. THE DRIVER LICENSE
1.1 PEOPLE REQUIRED TO HAVE A DRIVER LICENSE
Anyone who operates a motor vehicle, motor-driven cycle or moped on Colorado’s public streets and highways must be 16 or older and have a valid driver license.

Residents (C.R.S. 42-1-102 (81)): Anyone who owns or operates a business in Colorado, or who has resided within the state continuously for 90 days or who has obtained gainful employment within this state, whichever happens first, is considered a Colorado resident.

Special exemptions (C.R.S. 42-2-102 and 24-60-1106): The following people need not obtain a Colorado license if they are 16 or older and possess a valid license from their home state or state of last assignment.

Coloradoans: Any Colorado resident who is employed in another state, where the laws of that state require licensing to drive so they can engage in a regular trade or profession, does not need a Colorado driver license as long as the other driver license is valid and the employment is not terminated. This special exemption applies only if the office closing time is a member of the Interstate Driver’s License Compact Agreement.

Military: Anyone who is serving on active duty as a member of the U.S. military; this also includes the service member’s spouse and children.

Foreign military personnel: On duty or assigned to temporary duty with the U.S. military; this also includes the service member’s spouse and children.

Students: Anyone who is temporarily residing in Colorado with the purpose of furthering their education and is considered a nonresident for tuition purposes. Students must have a valid driver license from their state of residence.

Non-resident immigrants: Foreign tourists, instructors and business people may drive any non-commercial vehicle with their personal driver license.

1.2 PEOPLE WHO CANNOT BE ISSUED A COLORADO DRIVER LICENSE
- Anyone who does not submit proof of their date of birth, identity, or both, as required by the department
- Anyone unable to pass the driver license examinations
- Anyone with a license from another state that does not surrender that license (C.R.S. 24-60-1106)
- Anyone under suspension, revocation or denial of driving privileges in this or any other state
- Anyone adjudicated to be mentally incompetent, an alcoholic, or habitual user of narcotic drugs
- Anyone adjudicated with an Affidavit of Liability (DR 2460)
- Anyone who has unpaid fines or outstanding judgments for traffic violations
- Anyone younger than 16

1.3 OBTAINING A COLORADO DRIVER LICENSE
All applicants should allow ample time to complete the driver licensing process.

Depending on what is required (written test, drive skills test, etc.), the process’ length of the process can vary significantly. Additionally, Colorado issues different types of licenses that have different requirements, so please refer to the appropriate sections of this handbook for guidance.

Generally, Mondays, Fridays and days after holidays are the busiest. Appointments are available at some offices, please call for check Colorado.gov/DMV for more information.

To apply for a driver license or instruction permit:
- Applicants who are U.S. citizens, or who can demonstrate permanent lawful presence in the U.S., must:
  a. Submit identification establishing their date of birth, full legal name, identity and lawful presence in the U.S. such as (photocopies or notarized copies are not accepted):
    - U.S. passport with the applicant’s full legal name
    - Consular report of birth abroad
    - Consular identification card
    - Naturalization certificate
  b. Provide your Social Security card or proof of your Social Security number
  c. Social Security Account number card (not laminated)
  d. W-2 form (not accepted electronically)
  e. SSA-1099 form
  f. Pay stub with the applicant’s name and SSN on it

2. Applicants who are temporarily legal immigrants must:
   - Submit identification establishing their date of birth, full legal name, identity and temporary lawful presence in the U.S. such as:
     - Foreign passport with photograph accompanied by U.S. visa and I-94 that is verified by SAVE
     - Pending application for asylum in the U.S.
   - Pass all required examinations: physical, vision, written and driving test
   - Pay the required fees
   - Be fingerprinted (C.R.S. 42-2-104) and photographed (C.R.S. 42-2-114)

3. Applicants who are undocumented immigrants must:
   - Submit identification establishing their date of birth, full legal name, identity and (from their country of origin) with a:
     - Passport
     - Consular Identification card
     - Military identification document
     - Consular report of birth abroad
     - Naturalization certificate
   - Provide your Social Security card or proof of your Social Security number
   - Social Security Account number card (not laminated)
   - W-2 form (not accepted electronically)
   - SSA-1099 form
   - Non-SSA-1099 form
   - Pay stub with the applicant’s name and SSN on it

Note: Applicants under this section are part of the Colorado Road and Community Safety Act (CO-RCSA) (C.R.S. 42-2-501) and may visit any state office.

- Supply two documents that demonstrate your Colorado residence address
- Pass all required examinations: physical, vision, written and driving test
- Pay the required fees
- Be fingerprinted (C.R.S. 42-2-104) and photographed (C.R.S. 42-2-114)

Note: Applications under this section are part of CO-RCSA (C.R.S. 42-2-501) and will be by appointment only. Visit Colorado.gov/DMV for information.

Driving record analysis: The Division of Motor Vehicles examines your driving record and present license status to determine eligibility before issuing a new license.

Physical aptitude analysis: This is a determination, by the driver license employee, of any physical ailment or disability which may affect your driving. A confidential medical examination report is required for many physical ailments or disabilities such as epilepsy or paralysis.

Vision screening: Your vision will be tested to determine if you can see well enough to drive safely. If the test discloses you need corrective lenses to meet the minimum visual standards, your license will show this restriction. Failure to meet established vision standards will result in initial rejection and referral to a vision specialist for correction and recommendations at the applicant’s expense. The minimum vision standard is 20/40.

Written test: This covers various aspects of driving knowledge and safety. The test questions cover the content found in this handbook, driver road signs, driving under the influence, as well as other driving rules, safety rules and legal items.

For those applying under 1 above, while no appointment is necessary for the written test, it is recommended. Visit Colorado.gov/DMV to schedule an appointment.

No written test will be started within 30 minutes of the scheduled office closing time and no CDL written tests will be started within one hour prior to the scheduled office closing time.

For those applying under 3 above, written tests will be administered by appointment only.

Driving test: This is the most important part of the licensing process because it provides you with the opportunity to demonstrate you can drive safely.

All drive tests are by appointment only and will not be scheduled within one hour before to the scheduled office closing time.

1.4 CLASSES OF COLORADO DRIVER LICENSES
Colorado driver licenses are issued in various classes according to your age group and the type of vehicle for which you qualify.

Class R (basic license): Any motor vehicle which is not considered a motorcycle or commercial vehicle as...
2. TYPES OF INSTRUCTION PERMITS AND LICENSES

Instruction permits: An instruction permit allows limited driving privileges for people learning to drive. Regardless of age, if you are driving with an Instruction Permit, you must be accompanied by a person older than 21 who has a valid Colorado license and is riding in the seat beside you.

For more information including requirements, qualifications, endorsements and restrictions on the Commercial Driver License, please obtain a Commercial Driver Manual at Colorado.gov/DMV or at any driver licensing office.

For information on adding a motorcycle endorsement to either a basic or Commercial Driver License, please pick up a Motorcycle Operator’s Handbook from any driver license office or at Colorado.gov/DMV.

At a minimum, a valid, basic Class R license is required for the operation of low-power scooters (engine size of 50cc or 4476 watts or less, if electric 40 MPH max) and low-speed electric vehicles.

Class A, B and C (Commercial Driver License — CDL): A driver must have a Commercial Driver License to operate the following types of vehicles:

- Any motor vehicle with a gross vehicle weight rating (GVWR) of 26,001 pounds or more
- Any vehicle that transports quantities of hazardous materials that require warning placards under the Department of Transportation regulations
- Any vehicle designed to transport 16 or more passengers, including the driver
- The GVWR or GCWR of the vehicle(s) is not the weight of the vehicle(s), but the weight rating that the manufacturer assigned to the vehicle(s)

Any vehicle designed to transport 16 or more passengers, including the driver
- The GVWR or GCWR of the vehicle(s) is not the weight of the vehicle(s), but the weight rating that the manufacturer assigned to the vehicle(s)

For more information including requirements, qualifications, endorsements and restrictions on the Commercial Driver License, please obtain a Commercial Driver Manual at Colorado.gov/DMV or at any driver licensing office.

For information on adding a motorcycle endorsement to either a basic or Commercial Driver License, please pick up a Motorcycle Operator’s Handbook from any driver license office or at Colorado.gov/DMV.

Colorado Driver Handbook

Colorado Driver Handbook

Colorado Driver Handbook

Colorado Driver Handbook

Colorado Driver Handbook
Foster children: The Foster Children Driver License Act, effective July 1, 2019, streamlines the process for foster children to obtain a driver license. Although the licensing process has been streamlined, foster children must meet the same proficiency standards other Colorado drivers meet. By streamlining the licensing process for foster children, we are ensuring more proficiently trained Coloradans are on state highways and byways.

- Foster children are now exempt from having an Affidavit of Liability and Guardianship, if they have evidence of financial responsibility (insurance) in their name.
- Anyone who is at least 21 years old and has a valid driver’s license may instruct a foster child with a driving permit. Previously, foster children who had an instruction permit and were younger than 16 had to be instructed in driving by the person who signed the Affidavit of Liability.
- Foster children’s drive time logs (DR 2324) may now be signed by anyone who is older than 21 and has a valid driver license, if that person provided the instruction.

ADULT AGE GROUP: 21 or older

Instruction permit: Expires three years after issuance. Adults do not have to hold an instruction permit for any required amount of time but do have to first purchase an instruction permit before taking a drive test.

Adult license: Expires on the birthday five years from the year of issue. For those applying under the CO-RCSA (C.R.S. 42-2-501), the license expires three years from the date of issuance.

Temporary document: Driver license offices no longer have instant photo equipment. While your photograph is being taken, process offices will issue a paper temporary license, permit or ID card, which is valid for 30 days.

Note: You will receive your photo document in the mail, it is important that your address is correct. If you do not receive your photo document in the mail after 30 days, you should report it to the office where you originally applied.

Motorcycle endorsement: See the Motorcycle Handbook, available at Colorado.gov/DMV.

Identification cards: Any Colorado resident without a valid license may apply for a Colorado identification card. Per C.R.S. 42-2-114 and 42-2-501, Colorado law prohibits a person from having both a valid driver license and an identification card.

You must present identification establishing date of birth and lawful presence in the United States. lawful presence is not required for those applying under the CO-RCSA (C.R.S. 42-2-501) who are unable to demonstrate lawful presence.

Once you obtain a Colorado driver license or instruction permit, you will not normally have to repeat the written or driving test unless:
- You apply for a different class of license or add an endorsement
- You receive traffic tickets which result in suspension
- The license or permit is canceled, revoked or denied
- You let the license or permit expire for more than one year

You may renew an adult Colorado driver license at any time prior to the expiration date. Minor licenses cannot be renewed before the day of the 21st birthday and will expire 20 days after the 21st birthday. For those applying under the CO-RCSA (C.R.S. 42-2-501), the license expires 20 days after the 21st birthday or in three years, whichever comes first.

You must be eligible to renew your driver license or ID card online, or by mail, if you are 21 or older and you have been issued an adult, non-CDL driver license or adult ID card. Internet or mail renewal is available for two consecutive renewal cycles. CDL holders and individuals applying under the CO-RCSA are not eligible for this service. If you wish to have the written examination taken, you must appear in person at a driver license office.

Online renewal is available for 21 through 65 years of age. Please visit: Colorado.gov/DMV

3. NEW RESIDENT AND RENEWAL

Some offices in the Denver metro area provide limited services. If you do not take any tests, you must be able to save time by going to one of these offices. Check the list of offices at Colorado.gov/DMV for locations, services provided and hours of operation.

3.1 NEW RESIDENT WITH A VALID LICENSE

If you are 16 or older and have a valid license in your possession which was issued by another U.S. state, territory or possession, you will normally not be required to take the written test or the drive test. The driver’s license employee has a responsibility to require a drive test, even if you turn in a valid license, if there is a problem with your physical aptitude analysis or vision screening.

You must surrender your valid out-of-state driver license (C.R.S. 24-60-1106) and present identification showing proof of lawful presence in the U.S. along with your surrendered out-of-state driver license. Lawful presence is not required for those applying under the CO-RCSA (C.R.S. 42-2-501) who are unable to demonstrate lawful presence.

3.2 RENEW A DRIVER LICENSE OR INSTRUCTION PERMIT

To renew a Colorado driver license (issued for five years) or instruction permit (issued for three years), you will need to present your old license or permit, pass a vision test, pay the required fee and be fingerprinted and photographed.

You may renew an adult Colorado driver license at any time prior to the expiration date. Minor licenses cannot be renewed before the day of the 21st birthday and will expire 20 days after the 21st birthday. For those applying under the CO-RCSA (C.R.S. 42-2-501), the license expires 20 days after the 21st birthday or in three years, whichever comes first.

You must be eligible to renew your driver license or ID card online, or by mail, if you are 21 or older and you have been issued an adult, non-CDL driver license or adult ID card. Internet or mail renewal is available for two consecutive renewal cycles. CDL holders and individuals applying under the CO-RCSA are not eligible for this service. If you wish to have the written examination taken, you must appear in person at a driver license office.

Online renewal is available for 21 through 65 years of age. Please visit: Colorado.gov/DMV

4. DUPLICATE DRIVER LICENSE

4.1 LOST, STOLEN, OR DESTROYED LICENSE OR PERMIT

If your driver license is lost, stolen and destroyed and you are 21 or older, you will be required to renew this license or permit for the required renewal fee (C.R.S. 42-2-117 (1.5)). Duplicates are only available to minor drivers, commercial driver license holders and all instruction permit holders.

To replace or renew a lost, stolen or destroyed driver license or instruction permit, you must appear in person at any driver license office, present acceptable identification and pay the required fee.

4.2 CHANGE OF NAME AND/OR ADDRESS

Colorado law (C.R.S. 42-2-119 (1)(a)) requires that you notify the Division of Motor Vehicles in writing within 30 days of a name change or a change of address.

Change of name: If you are changing your name, you must appear at a driver license office in person, with legal, original, or certified documentation (i.e. recorded marriage certificate, divorce decree, court order). If you have a social security number, you must change your name with the Social Security Administration before visiting a driver license office.

At the time you change your name, you will be required to renew your driver license for the standard renewal fee.

Change of address: For emergency notification purposes, to receive a renew-by-mail application or to receive your license in the mail, it is important to keep the Division of Motor Vehicles informed of your current address. You can change your address at any driver license office or by mailing our self-service change of address postcard, available at any driver license office or on Colorado.gov/DMV.

5. EXTENSION OF A COLORADO DRIVER LICENSE

The Division of Motor Vehicles examines your driving record, driver license status and the type of license before issuing an extension.

Note: Please include your full name, birth date and license number on any extension requests.

For non-CDL licenses:

Military: Only one three-year extension is given for Colorado driver license holders who are on active duty outside the state. You may request an extension card before the expiration date of the license. The request must include a copy of your military orders or a letter from your commanding officer stating you are an active military duty and currently stationed outside the state.

Civilian: The charge for a one-year extension is $6.50. Add $2.50 if you have a new photograph or if your last two renewals were done by someone else.
- If you are out-of-state when your license will expire, you may obtain a one-year extension.
- If you are out of the country when your license
will expire, you may obtain up to two one-year extensions.

- If you are unable to renew your license due to a medical condition, you may obtain a one-year extension. The request must include a statement from your doctor.

Mail all extension requests and required information to:

Regular mailing address:
Division of Motor Vehicles
Driver Services, Rm 164
PO Box 173350
Denver, CO 80217-3350

Overnight requests:
Division of Motor Vehicles
1881 Pierce St., Rm 164
Denver, CO 80214

For CDL licenses: Due to medical and testing requirements for CDL drivers, only a 30-day extension is available. Please contact either of the above addresses for more information.

6. KEEPING YOUR LICENSE

License/driving privilege status: Having a driver license is a privilege. Protect that privilege by driving with care and consideration for others.

Valid driving privilege: The individual may apply for or have a Colorado driver license. There are no restraint actions against that privilege.

Valid driver license: The driver license is considered legally in force and authorizes the individual to drive.

Clearance: A formal indication from a state, on letterhead, or an official state form, that the applicant has valid driving privileges and is clear to apply for a Colorado driver license.

Reinstatement: A procedure to restore an individual’s driving privilege. Reinstatement of driving privileges does not always reinstate the driver license. Reinstatement of the driving privilege may be processed even with outstanding tickets, however, a new permit or license may not be issued until the individual can show clearance of any such tickets. The following are actions that affect your driving privilege or driver license. These actions may be for a specific amount of time and/or until certain conditions are satisfied. You may not drive while under any of these actions.

Cancellation: An action to void a valid driver license. This action does not require reinstatement.

Denial: A restraint action taken when an individual does not have a Colorado driver license. This action may require reinstatement.

Suspension: A restraint action that temporarily invalidates the driver license and withdraws the driving privilege. This action requires reinstatement. The following actions require the individual to reinstate their driving privilege, pass the written test, purchase an instruction permit, pass the driving test and purchase a new driver license.

6.4 SHARING THE ROAD WITH BICYCLISTS

Because bicycles are vehicles under Colorado law, they have the rights and responsibilities to be on all roads unless it’s designated otherwise. Therefore, sharing the road
with them is important to everyone’s safety. Some streets have shared lane markings or “sharrow” painted on them reminding drivers that bicyclists may ride in the center of the lane. However, bicyclists are allowed to “take the lane” under numerous conditions. Please see Section 13.5 for more information on correctly interacting with bicyclists.

7. UNDERSTANDING COLORADO’S MOTOR VEHICLE LAWS

7.1 MOTOR VEHICLE INSURANCE DATABASE LAW

A statewide database tracks compliance and noncompliance of motor vehicle insurance requirements within Colorado. Vehicle insurance companies must submit information weekly on policies issued during the previous week. Vehicle registration offices also submit information to the database on vehicles registered. Should you be stopped by a police officer, if you do not have evidence of insurance in your vehicle and you are not listed in the database as having insurance, your license is subject to confiscation and suspension. Per C.R.S. 42-2-127.7, you may request a hearing or present evidence of insurance, that was valid at the time, to avoid license suspension, at a driver license office. Visit Colorado.gov/DMV for a list of locations and services.

Evidence of Insurance:

Evidence of insurance includes the insurance company, policy number, date of expiration and vehicle covered, and must be in your motor vehicle while in operation.

7.2 FINANCIAL RESPONSIBILITY LAW/COMPULSORY INSURANCE

The minimum insurance you must have in addition to personal injury protection is:

- \$25,000 for bodily injury or death to one person in any one accident.
- \$50,000 for bodily injury or death to two or more persons in any one accident.
- \$15,000 property damage coverage.

In the event of an accident, evidence of insurance must be shown for all vehicles involved even if:

- The driver was not at fault in the accident.
- The vehicle was parked.
- There was no injury or damage to any other party.
- The accident results in damages that are less than \$1,000.

The Division of Motor Vehicles is allowed to accept the insurance information noted on the traffic officer’s accident report or on counter reports filed with law enforcement agencies. The Division of Motor Vehicles has the authority to send notice for additional information to the driver if the insurance information is incomplete on the officer’s report or if the report indicates there was no insurance at the time of the accident.

7.3 COLORADO SAFETY BELT LAWS

Colorado’s safety belt laws require a fastened safety belt must be worn in all motor vehicles with a factory-equipped safety-belt system, while in operation on public roadways by:

- The driver.
- Every front seat passenger.
- Every child between 8 and 16 seated in the vehicle.
- Occupants in motor vehicles driven by those younger than 18 shall be properly restrained or wear seat belts as required in C.R.S. 42-4-236 and 42-4-237.

The only exceptions are:

- Emergency personnel.
- Passenger buses and school buses.
- Farm equipment.
- Motorcycles.
- Driver of delivery van on the job.
- Anyone carrying a written medical statement from a physician stating why he or she is not physically or psychologically required to wear the safety belt.

Note: Always wear both shoulder and lap safety belts and tight.

7.4 COLORADO CHILD PASSENGER PROTECTION LAW

Children are required, by law, to be properly fastened into appropriate child restraint systems. This includes a child who is on a scooter or in a toy vehicle. It is the responsibility of the driver to ensure that each child is properly fastened into one of the following:

- Children younger than 1, who weigh less than 20 pounds, in a rear-facing child restraint system in a rear seat of the vehicle.
- Children 1 or older, but younger than 4 who weigh less than 40 pounds, in a rear-facing or forward-facing child restraint system.
- Children younger than 8, being transported in a motor vehicle in this state, shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.

7.5 COLORADO GRADUATED LICENSE LAW

Colorado law requires a minor applying for a driver’s license must have one plate attached to the front, semi-tractors must have one plate attached to the rear, and all other vehicles driven by Colorado drivers are required to have at least one plate attached to both the front and rear of the vehicle.

Exceptions: Motorcycles, trailers and semitrailers must have one plate attached to the rear, semi-tractors must have one plate attached to the rear. Temporary (paper) license plates should be attached in place clearly visible on the rear of the vehicle.

Note: Any change of address or name must be reported within 30 days to your local county motor vehicle office.

If you are moving into Colorado, you must obtain new license plates within 30 days of establishing Colorado residency. (C.R.S. 42-2-107 (a)(bj))

Emission test required: Colorado’s “AIP” Program requires emissions tests for vehicles registered in the following counties:

Gas: Boulder, Broomfield, Denver, Douglas and Jefferson; and portions of Adams, Arapahoe, Larimer and Weld.

If you are unsure if a test is required in your area, please contact your local county motor vehicle office. If you have a question whether you need a test in Adams, Arapahoe, Larimer, or Weld County contact your local DMV office at the number below.

Adams County (720) 523-6010
Arapahoe County (303) 795-4500
Larimer County (970) 498-7878
Weld County (970) 353-3840

8. DRIVING UNDER THE INFLUENCE

8.1 Alcohol and driving

Driving while impaired by alcohol is one of the greatest factors in roadway crashes and the resulting injuries and fatalities. Every year, tens of thousands of people are killed and injured in alcohol-related traffic crashes.

Impaired drivers are more likely to take excessive risks such as speeding or turning abruptly. The impaired driver also will have slowed reaction times and will not be able to react quickly to avoid a crash. It is also unlawful for someone to drink from or possess an open container of alcohol while in the passenger area of a motor vehicle that is on a public road.

Alcohol is a depressant drug that affects the central nervous system which affects the brain. Alcohol slows reflexes and reaction times while reducing the ability to make decisions necessary to safely operate a motor vehicle. As the amount of alcohol in your body increases, a person’s judgment worsens and skills decrease.

The amount of alcohol absorbed in your blood stream is what is called a person to feel the effect of drinking. This is called Blood Alcohol Concentration (BAC). BAC is identified by a chemical test, of blood or breath. The driver with a BAC between 0.05% and 0.07% is presumed to be Driving While Ability is Impaired (DUI).

To the driver of a vehicle involved in an accident where the driver is physically incapable of reporting the accident, you are required to report the accident and, if directed by police, to remain at the scene of the accident until police arrive. Failure to do so is a Class 2 misdemeanor traffic offense.

7.7 USING A PORTABLE TELEPHONE WHILE DRIVING

Colorado law prohibits drivers younger than 18 from using a cell phone while driving, unless it is to contact the police or fire department or it is an emergency. Drivers 18 and older may not use a cell or mobile telephone for text messaging while driving unless it is to contact the police or fire department or it is an emergency.

7.8 TOY VEHICLES PROHIBITED ON A PUBLIC ROAD

A toy vehicle includes, but is not limited to: gas-powered or electric-powered mini bikes, pocket bikes, kamikaze boards, segways, scooters or stand-up scooters.

- Vehicles driven by children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.
- Children younger than 8, being transported in a motor vehicle in this state shall be properly restrained in a child restraint system, according to the manufacturer’s instructions.
- Children between 8 and 16 years old, being transported in a motor vehicle in this state shall be properly restrained in a safety belt or child restraint system according to the manufacturer’s instructions.

Colorado Driver Handbook

Colorado Driver Handbook
8.4 YOUNGER THAN 21

Effective August 5, 2009, any driver younger than 21, convicted of DUI or DWAI, is subject to revocation for the first conviction if they fail to complete a court-ordered evaluation or program. A second or third conviction is a mandatory revocation.

8.4A ZERO TOLERANCE

Drivers younger than 21 with a BAC of .02 but less than .08 are subject to a mandatory revocation of their driving privilege.

8.4B BUY AND POSSESS

Anyone younger than 21 who buys or possesses liquor (including beer) is subject to mandatory revocation of their driving privilege even if driving is not a factor.

8.4C SUPPLYING ALCOHOL TO MINORS

The department must suspend, for six months, the driving privilege of anyone convicted of providing any alcoholic beverage to minors under 21. This includes providing identification for a minor under 21 to use to purchase alcohol.

9. BEFORE YOU DRIVE

Being a safe driver depends on being able to see clearly, not being overly tired, not driving under the influence of alcohol or drugs, being generally healthy, and being emotionally fit to drive.

Vision: Good vision is a must for safe driving. You drive based on what you see. If you cannot see clearly, you will have trouble identifying traffic and road conditions, spotting potential trouble and reacting in a timely manner. It is important to have your eyes checked every year or two by an eye specialist. If you already agreed to take a chemical test of their blood, breath or urine to determine the alcohol and/or drug content in the blood.

If a law enforcement officer suspects that a person are driving while impaired or under the influence of alcohol and/or drugs, the law enforcement officer can require that a person take a chemical test of their blood, breath or urine.

If a person refuses to take the test or does not comply with the testing procedure, their driver license will be revoked for a period of 60 days and they will be required to install an interlock device on any vehicle they drive for two years. If other suspensions or revocations come about from this same incident, they will be added onto the end of the revocation (consecutively).

Because driving “under the influence” is so dangerous, the penalties for alcohol or drug related violations are very tough, and DUI enforcement efforts by Colorado law enforcement are a top priority that can include jail, fines and suspension of driving privileges. Colorado law does not allow a person to plea bargain out of an alcohol or drug related driving offense.

The only sure way to avoid the consequences is not to use alcohol or drugs at all when driving.

8.3 EXPRESS CONSENT LAW (C.R.S. 42-4-1301)

The express consent law means that when a person operates a motor vehicle within the state, they have already agreed to take a chemical test of their blood, breath or urine to determine the alcohol and/or drug content in the blood.

The only sure way to avoid the consequences is not to use alcohol or drugs at all when driving.

8.4 YOUNGER THAN 21

Effective August 5, 2009, any driver younger than 21, convicted of DUI or DWAI, is subject to revocation for the first conviction if they fail to complete a court-ordered evaluation or program. A second or third conviction is a mandatory revocation.

8.4A ZERO TOLERANCE

Drivers younger than 21 with a BAC of .02 but less than .08 are subject to a mandatory revocation of their driving privilege.

8.4B BUY AND POSSESS

Anyone younger than 21 who buys or possesses liquor (including beer) is subject to mandatory revocation of their driving privilege even if driving is not a factor.

8.4C SUPPLYING ALCOHOL TO MINORS

The department must suspend, for six months, the driving privilege of anyone convicted of providing any alcoholic beverage to minors under 21. This includes providing identification for a minor under 21 to use to purchase alcohol.

9. BEFORE YOU DRIVE

Being a safe driver depends on being able to see clearly, not being overly tired, not driving under the influence of alcohol or drugs, being generally healthy, and being emotionally fit to drive.

Vision: Good vision is a must for safe driving. You drive based on what you see. If you cannot see clearly, you will have trouble identifying traffic and road conditions, spotting potential trouble and reacting in a timely manner. It is important to have your eyes checked every year or two by an eye specialist. If you
have a corrective lenses restriction on your license, you need to wear glasses or contact lenses while driving. 

**Hearing:** Hearing is helpful to safe driving. The sounds of horns, a siren, or screeching tires can warn you of danger. Hearing problems, like bad eyesight, can come on so slowly that you do not notice it. These problems should be addressed on a regular basis. And, per C.R.S. 42-4-1411, it is illegal to wear any type of headphones while you are driving because they can interfere with your hearing.

**Fatigue:** Your eyes are tired, you cannot drive as safely as when you are rested. Your reactions and decision making skills are greatly reduced. Break long driving periods into two-hour segments. If you become very drowsy, pull off the road and rest! These problems should be addressed on a regular basis. Many health problems, such as a bad cold, infection or a virus, can affect your driving. Even little problems such as a stiff neck, cough or sore leg can affect your driving. Some conditions can be very dangerous, such as diabetes, epilepsy and heart conditions. Check with your doctor if you think your health condition could affect your driving.

**Emotions:** Emotions can greatly affect safe driving. You may not drive well if you are overly worried, excited, afraid or angry. Do not allow yourself to become distracted by your radio or your music. In the time it takes to change radio stations, lives may be changed forever.

**Temperature:** Be sure you check the temperature, and secure any loose objects in the car. Be sure you and everyone else in the vehicle, particularly children, are wearing restraint devices. Do not allow yourself to become distracted by your cellphone, conversations with passengers, noisy children or rubbernecking.

Limit your cellphone use while driving to brief, essential or, if younger than 18, emergency calls, only. Pull off the road to a safe area for longer cellphone conversations or to control children. Do not attempt to eat or drink, read, smoke, apply makeup, shave or adjust the music while you are driving. In the time it takes to change radio stations, lives may be changed forever.

**Vehicle:** How safely you can drive includes the vehicle you are operating. Motorists are responsible to ensure the vehicles they drive are safe to operate. A vehicle in poor operating condition is unsafe, costs more to run and may not get you out of an emergency situation, such as a breakdown or collision. Follow your vehicle owner’s manual for routine maintenance. A few simple checks will prevent trouble on the road and ensure your vehicle is in compliance with Colorado motor vehicle laws:

- **Braking system:** If the brakes do not seem to be working properly, such as the brake pedal going to the floor, have a mechanic check them immediately.
- **Lights:** Make sure turn signals, brake lights, tail lights and head lights are operating properly.
- **Windshield and wipers:** Damaged glass can easily break in a minor collision or when something hits the windshield. Have the windshield replaced. Windshield wipers keep the rain and snow off the windshield. Make sure they are in good operating condition. If the blades have not been working well, replace them. Keep the windshield clean inside out, and keep your window washer bottle full. Clear snow, ice or frost from all windows.
- **Tires:** Worn or bald tires can increase your stopping distance, make turning more difficult, can cause hydroplaning at lower speeds when the road is wet, and increase the chance of having a breakdown or collision. Follow your vehicle owner’s manual for routine maintenance.

**CHECK TIRE PRESSURE WITH A PRESSURE GAUGE**

- Buy a tire pressure gauge if you don’t have one already.
- Open your car door; on the inside jamb, you should see a sticker. Write down or take a picture of the number that says “PSI” (the measurement for tire pressure).
- Remove the cap from the valve stem and use the pressure gauge to check the tire pressure (make sure you check when they are cold).
- Compare the number on the gauge with the number you wrote down. If the number is too high, let air out of your tires. If the number is too low, inflate your tires until the numbers match.

**CHECK TREAD DEPTH WITH A PENNY**

- Hold a penny with Abraham Lincoln’s head between your thumb and forefinger.
- Place Lincoln’s head first into the deepest looking groove.
- Can you see all of his head? If yes, your tires are too worn – don’t drive on them, and make sure to get them replaced.

**10. BASIC DRIVING**

**Starting the engine:** Check the vehicle owner’s manual for how to start the vehicle. To start the engine, place your right foot on the brake pedal and check the gear selector lever for park. Place the key in the ignition and turn the ignition switch to the on position. Check indicator lights and gauges. A poorly tuned engine may lose power needed for normal driving and emergencies, may not start, gets poor fuel economy, pollutes the air, and could cause you if you are on the road, causing problems for you and other traffic.

**Horn:** The horn should be checked for operation periodically.

**Mirrors:** Adjust your rear view mirror and side mirrors before you begin to drive. You should be able to see out the side mirrors, and see the road behind you. Otherwise, if you are on the road, check the mirrors several times before you set off to ensure you can see the lane behind and most of the lane next to you.

**Lights:** Make sure there are no packages or objects on the rear shelf or back seat that could injure someone during a sudden stop or crash. Ensure there are no objects on the floor that could roll under the brake pedal or accelerator and interfere with your safe driving.

**Head restraints:** They should be adjusted so the head restraint touches the back of the head.

**Moving the vehicle:** Move your gear selector lever to “D” (drive). Check forward for safe path and check to the sides and behind. Signal and (if safe) move your foot to the accelerator and press gently. Accelerate gradually and smoothly with your foot on the floor and the heel of your foot on the floor.

**Stopping the vehicle:** Check your mirrors for traffic to the rear of your vehicle. Move your foot from the accelerator to the brake pedal. With steady pressure, press until your vehicle comes to a stop.

**Steering:** The steering wheel is always turned in the direction you want the vehicle to move, whether moving forward or in reverse.

**11. RULES OF THE ROAD**

**Traffic controls**

Traffic controls include traffic signals, traffic signs, and pavement markings. Traffic control also can be provided by law enforcement, highway personnel, or school crossing guards. You must obey directions from these persons.

**11.1 TRAFFIC SIGNALS**

Traffic signals are lights that tell you when or where to stop and go. Traffic lights are usually at intersections and are (from top to bottom) red, yellow and green.

- **Steady red light:** Stop until your vehicle comes to a stop.
- **Steady yellow light:** Prepare to stop.
- **Steady green light:** Go. Allow all vehicles and pedestrians to cross the intersection.

Traffic signals are provided by law enforcement, highway personnel, or other objects on the road. Make sure you obey the traffic signal. If you are going the wrong way, you may turn right, move the light is red. Also, you may turn left on a red light if you are turning from one-way street onto another one-way street, unless prohibited by a sign.
Traffic signs tell you about traffic rules, hazards, current location, give directions, and where services are. The shape and color of these signs give clues to the type of information they provide.

Regulatory: These signs tell you of laws and regulations that apply at a location. They are black or red on a white background. Failure to obey these signs is a traffic violation.

Prohibited signs: These signs indicate you cannot do something. For example, no left turn or no U-turn.

Speed limit signs: These signs indicate the maximum or minimum safe speed that is allowed. The maximum limits are for ideal conditions and you must reduce your speed when conditions require it.

Stop signs: This sign means you must come to a complete stop. Stop at the marked stop line or, if none, at the point just before the intersecting street. If there is a crosswalk, you must come to a complete stop before entering it. You may proceed only after yielding to all pedestrians and vehicles.

Yield signs: This sign indicates drivers must reduce speed or stop to yield right-of-way to any traffic on the roadway they are crossing or entering. Do not enter/Wrong way signs: These signs warn and redirect drivers who are heading the wrong way on streets or freeway ramps. Do not proceed past one of these signs.

One way signs: Travel only in the direction indicated by the arrow on the sign.

Lane control signs: These signs give direction and information about where you can turn and often use an arrow symbol. The signs are along the road or hanging over the road. Sometimes arrows may be painted on the road.

Prohibited signs: These signs indicate you cannot do something. For example, no left turn or no U-turn.

Railroad crossings: Many railroad crossings have signs or signals to warn drivers. Never try to beat a train across the tracks. Never start to cross the tracks until there is enough room for your vehicle to clear the tracks on the other side. Do not shift gears when crossing the railroad tracks in case your vehicle stalls.

Railroad emergency notification system (ENS): The blue colored sign is at every highway-rail grade crossing, and provides the public with a 24/7/365 telephone number to report problems or emergencies at these railroad locations. Directly below the dispatch number on the ENS sign is a Department of Transportation number that identifies the exact location of the crossing in question.

Slow moving vehicle: A reflective orange triangle on the rear of a vehicle means it is designed to travel at speeds slower than 25 miles per hour.

Disabled parking signs: These signs mark special parking areas for only those vehicles displaying a disabled parking permit. Disabled parking indicators may also appear on the pavement in designated parking spaces.

15
Crosshatched sections are for van access, only, and parking is not allowed at any time. In order to park in a designated disabled parking spot without a placard or plate, they will be subject to a misdemeanor with a fine of between $530 to $5,000, possible jail time, loss of driving privileges, and/or their car being impounded. If someone parks in one of these spaces with a placard or plate not issued to them personally, they will be subject to double the fines listed above as well as jail time, loss of driving privileges and towing.

11.1C PAVEMENT MARKINGS

Lines and symbols on the roadway divide lanes, tell you when you may pass other vehicles or change lanes, which lanes to use for turns, define pedestrian walkways, and mark where you must stop for traffic signals or signs.

Yellow lines: Separate traffic moving in opposite directions.
- **Broken yellow line**: Drive on the right side of the road and pass with care.
- **Solid yellow line**: Means a no passing zone.
- **Double solid yellow lines**: Neither side can pass.
- **Solid and broken yellow lines**: You may not pass if the solid yellow line is on your side. If the broken yellow line is on your side, you may pass if it is safe to do so.

You may cross a solid yellow line for a left turn into an alley, private road or driveway when such movement can be made safely.

**HAWK signals**: High Intensity Activated Crosswalk (HAWK) signals are for pedestrian crossings. When the signal is black the driver will proceed cautiously. When a pedestrian activates the signal, it will flash yellow, which means the driver must slow down and be ready to stop. The light will then turn solid yellow to tell the driver to stop if possible. Then the signal will turn to a solid red, indicating the driver must stop. Finally, the signal will flash red, telling the driver to stop and yield to pedestrians.

11.1D LANE CONTROLS

As a rule you must drive your vehicle on the right half of the road. Use only one lane, do not straddle lanes. On roadways without designated bicycle lanes, bicycles are generally required to stay to the far right side of the right lane. They may use the entire lane to pass another vehicle, avoid objects in the road, and turn left.

**Restricted lane**: One or more lanes may be restricted for special use. Restricted lanes are marked by signs or pavement markings stating that the lane is restricted for special use. There will be a white diamond painted on the road within the lane, and/or a sign posted at the side of the road which specifies its use. Examples are transit, bus or bicycle lane.

**High occupancy vehicle (HOV) lane**: These lanes are identified by a white diamond painted on the roadway, signs will identify the types of vehicles and the number of occupants required per vehicle to use the lane.

**Reversible lane**: Some travel lanes are designed to carry traffic in one direction at certain times and in the opposite direction at other times. These lanes are separated by a barrier or marked by double-broken yellow lines. There may be signs posted by the side of the road or overhead. Sometimes special lights are used.

**Shared center turn lane**: These center lanes are reserved for turning and are used by vehicles traveling in both directions. You may turn into or from the road using this lane. You may stop in this lane until it is safe to complete the turn. When a street has a shared center turn lane, you may not turn left from any other lane. This lane is not to be used to pass another vehicle.

**White lines**: Separate lanes of traffic moving in the same direction.
- **Broken white line**: You may change lanes if it is safe.
- **Solid white line**: Requires you to stay within the lane and also marks the shoulder of the roadway.

Crosswalks: Crosswalks define the area where pedestrians are to cross the roadway. They exist where the lines are marked or unmarked. You must stop behind the crosswalk to allow any pedestrians to cross. Whenever you approach any vehicle from the rear that is stopped at a crosswalk, you may not pass that vehicle.

These are some of the most common types of crosswalk markings. Be aware that there are other types as well.

**Unmarked lane**: When there are no signs or pavement markings to control the use of lanes, there are rules that indicate which lane is to be used.

- **Drive just to the right of the center of the road.**
- **Do not drive on the shoulder of the road.**
- **The same rules for passing and turning on marked roads apply with unmarked roads.**

**Rotary Island/Roundabout lane**: Yield to traffic already within the rotary island. Drive to the right and watch for directional signs and signals. You must signal before exiting the roundabout.

**Unmarked lane**: When there are no signs or pavement markings to control the use of lanes, there are rules that indicate which lane is to be used.

- **Drive just to the right of the center of the road.**
- **Do not drive on the shoulder of the road.**
- **The same rules for passing and turning on marked roads apply with unmarked roads.**

**Rotary Island/Roundabout lane**: Yield to traffic already within the rotary island. Drive to the right and watch for directional signs and signals. You must signal before exiting the roundabout.

**Shared center turn lane**: These center lanes are reserved for turning and are used by vehicles traveling in both directions. You may turn into or from the road using this lane. You may stop in this lane until it is safe to complete the turn. When a street has a shared center turn lane, you may not turn left from any other lane. This lane is not to be used to pass another vehicle.

**White lines**: Separate lanes of traffic moving in the same direction.
- **Broken white line**: You may change lanes if it is safe.
- **Solid white line**: Requires you to stay within the lane and also marks the shoulder of the roadway.

Crosswalks: Crosswalks define the area where pedestrians are to cross the roadway. They exist where the lines are marked or unmarked. You must stop behind the crosswalk to allow any pedestrians to cross. Whenever you approach any vehicle from the rear that is stopped at a crosswalk, you may not pass that vehicle.
Exceeded safe speed for conditions
(C.R.S. 42-4-1101(3)):

“No driver of a vehicle shall fail to decrease the speed of such vehicle from an otherwise lawful speed to a reasonable and prudent speed when a special hazard exists with respect to pedestrians or other traffic or by reason of weather or highway conditions.”

Diverging diamond interchange (DDI): A diverging diamond interchange crosses traffic to the opposite side of the road across an interchange so vehicles have uninterrupted movements onto the freeway ramps. Left-turn movements, which are a typical challenge with standard four-way interchanges, are eliminated with a DDI, which allows for fewer conflicts with other vehicles.

11.2 RIGHT OF WAY

Where vehicles or pedestrians meet one another, and there are no signs or signals to regulate traffic, there are rules that say who must yield the right-of-way. These rules tell drivers who goes first and who must wait in different traffic situations.

The law states who must yield the right-of-way; it does not give anyone the right-of-way, even if your traffic signal is green. You must do everything you can to prevent striking a pedestrian or another vehicle, regardless of the circumstances.

Pedestrians: When driving, you should yield the right-of-way to pedestrians under all conditions. Be particularly watchful for children, elderly and blind people. Most blind people are easily recognized by the white cane they carry and/or by their guide dog. Pedestrians have the right-of-way at all intersections and crosswalks. Drivers must come to a complete stop and let the person pass safely.

Bicycles: Bicycles on the road are considered vehicles and have the same rights and responsibilities as motor vehicles.

Four-way stop: You must yield the right-of-way to the vehicle that reached the intersection first. When more than one vehicle reaches the intersection at the same time, the vehicle on the left must yield the right-of-way and allow the vehicle on the right to go first.

Uncontrolled intersections: When more than one vehicle reaches an uncontrolled intersection at the same time, the vehicle on the left must yield the right-of-way to the vehicle on the right and allow the vehicle on the right to go first.

Turning left: You must yield to all oncoming traffic.

Changing lanes and passing: You must yield the right-of-way to vehicles already occupying the lane you wish to enter or pass for. Do not change lanes if another vehicle must slow down for you.

Merging: You must yield to all vehicles on that roadway. Do not merge if another vehicle must slow down for you.

Back: You must yield the right-of-way to all vehicles close enough to be a hazard.

Narrow mountain roadway: When vehicles meet on a steep, narrow road, reduce speed, adjust lane position away from workers and prepare for the unexpected. Failure to comply can result in double fines for certain violations.

Emergency vehicles: You must yield the right-of-way to all emergency vehicles using a siren, air horn, and/or or flashing red, blue or white lights. Where possible, you must pull over to the right edge of the road. If you are in an intersection, drive through the intersection before you pull over. On a roadway with two or more lanes traveling in the same direction, if you are approaching an emergency vehicle that has stopped along the side of the road, when possible you must leave at least one lane between your vehicle and the emergency vehicle by changing lanes, unless directed otherwise by a law enforcement officer or emergency personnel or conditions prohibit the lane change. If the road only has one lane on your side, or you cannot change lanes, slow down to a safe speed and use due care and caution as you pass.

Maintenance vehicles: Yield the right-of-way to service vehicles and maintenance equipment engaged in work upon the roads using flashing yellow and blue warning lights. Use extra caution in approaching, overtaking or passing maintenance vehicles and snow plows. Because of their traveling speed and size, snowplows tend to create large clouds of blowing snow that conceal the plow, making it invisible.

School bus: You must stop your vehicle at least 20 feet before reaching a school bus that is stopped with its red lights flashing whether it is on your side of the road, the opposite side of the road or at an intersection you are approaching. You must remain stopped until the flashing red lights are no longer operating. Watch carefully for children near the school bus and children crossing the roadway before proceeding.

You are not required to stop if the bus is traveling toward you on a roadway that is separated by a median or other physical barrier.

Transit buses: Drivers in the same lane of traffic behind a transit bus (such as an RTD bus, for example) are required to yield the right-of-way to the bus, if the bus after stopping to allow passengers to board or exit, is signaling to enter a traffic lane and the yield warning sign on the back of the bus is illuminated. These yield signs are a warning to drivers behind transit buses that they are required to yield when the bus is entering a traffic lane.

Road work/Construction zone: You must yield the right-of-way to all workers, construction and construction vehicles.

Back: You must yield the right-of-way to two vehicles, the vehicle going downhill must yield the right-of-way by backing up to a wider place or by stopping to leave sufficient space for the vehicle going uphill, except where it

11.3 SPEED

Many fatal accidents on Colorado highways involve excessive speed. Of all the possible causes of accidents, speeding or driving too fast for conditions is perhaps the most common and the most dangerous.

 Limits: Speed limit signs indicate the maximum speed allowed in ideal conditions. Some roads, such as freeways, have minimum speed limits posted. Driving slower than the minimum speed limit, in ideal conditions, is a traffic violation. Regardless of what the posted limit is, your safety and the safety of others may be affected by many things and it may be necessary to reduce your speed.

Reduced speed zones: At various locations, such as school zones and construction zones, a reduced speed is required during certain hours or periods of the day when temporary hazards exist. Signs will indicate when the lower speed limit is in effect.

Unusual or unexpected. Colorado speed limit signs are as follows:

- 20 mph on narrow, winding mountain highways and blind curves
- 25 mph in any business district
- 30 mph in any residence district
- 40 mph on open mountain highways
- 45 mph for vehicles in the business of hauling trash
- 55 mph on urban interstate and highways
- 65-75 mph on designated rural interstate and highways

Stopping distance: Be alert so you know when you will have to stop well ahead of time. Stopping suddenly is dangerous and usually points to a driver who was not paying attention. When you brake quickly, you could skid and lose control of your vehicle. You also make it harder for drivers behind you to stop without hitting you.

Try to avoid panic stops by seeing events well in advance. By slowing down or changing lanes, you may not have to stop at all, and if you do, it can be a more gradual and safer stop.

11.4 TURNING

The most common faults when making turns are failing to signal, not signaling long enough, failing to search for hazards, turning from the wrong lane and failing to turn properly.

In urban or metropolitan areas, you must signal continuously for 100 feet before making a turn or lane change.

At speeds above 40 mph you must signal continuously for 200 feet before making a turn or lane change.

Extra caution should be used by the drivers of cars A and B when a private drive or side street is near a main intersection.

- Driver A should not assume that driver B will yield the right of way.
- Driver B should not assume where driver A is turning.
After you #skiptthetripco with DMV online services, go outside and appreciate Colorado’s natural beauty. Since 1983, the Colorado Lottery has invested $3.4 billion in Colorado parks, trails, recreation centers and open spaces. Funding all the ways Colorado plays. Play on, Colorado.

Signaling: Failure to signal is a traffic violation. Before making any turn, whether the turn is into another roadway, a parking lot, another traffic lane or leaving a parked position, it is extremely important that you signal. Your signal lets other drivers, cyclists, and pedestrians know your intentions. In urban or metropolitan areas, you must signal continuously for 100 feet before making a turn or lane change. On four-lane highways where the posted speed limit is faster than 40 mph you must signal for 200 ft. Failing to signal is a traffic violation.

If your vehicle’s turn signals do not work, you must use hand signals. If using hand signals, end your signal before starting to make your turn and place both hands on the wheel while making your turn.

Turning from the proper lane:
- If you are making a left turn, you must begin in the left-most lane. If you are making a right turn, you must begin in the right-most lane, unless traffic signs, signals or lane markings clearly permit turning from more than one lane.

Turning in a correct path: Do not turn too short so as to cut corners on left turns or run over the curb on right turns. Turning too wide or too late, straddling lanes or turning into the wrong side of the street will result in your not being able to turn into the correct lane. Complete your turn in the lane closest to you on your side of the street. Always follow the solid white lines in intersections using multiple turn lanes.

Left turns: If turning left, you should wait at the stop line or crosswalk until there is a gap in traffic large enough to allow you to pull into the intersection and complete your turn. Pulling into the intersection to wait to turn left blocks the intersection for emergency vehicles, limits visibility for oncoming traffic and puts you in a position to get in an accident if the light changes and oncoming traffic runs the red light while you make your turn. Never turn the front wheels towards the left while you are waiting to turn. If you happen to get rear ended, you would be pushed into oncoming traffic.

U-turns: U-turns are forbidden unless they can be made without endangering other traffic. Prohibitory signs are usually posted at hazardous locations. Normally, U-turns are permitted where your vehicle can be seen from a great distance. However, it is always preferable to continue to the next street or turn-around area if a U-turn cannot be made safely. Do not try to make a sudden U-turn in front of traffic traveling either direction.

Two-point turnabout: In this type of turn, a street, alley, or driveway is used to reverse the direction you are traveling when it is not practical or possible to drive around a block.

Reverse two-point turnabout: Signal your intention to turn right. Stop and check traffic to the sides and rear of the vehicle. Move back until the rear bumper of the vehicle reaches the near edge of the driveway. While backing slowly, steer rapidly all the way to the right. As the vehicle centers in the driveway, straighten the wheels and stop. Shift to drive and check in both directions; if clear, signal and turn left into the proper lane and accelerate as appropriate.

Forward two-point turnabout: Check your mirrors and signal your intention to turn left. Check your mirrors and signal your intention to turn left.

This illustration shows the proper way to turn from a one-way street on to a two-way street.

This illustrations shows the proper way to conduct left and right turns from a two-way street.

This illustration shows the proper way to turn from double turn lanes.

This illustrations shows a forward two-point turnabout.

This illustration shows a reverse two-point turnabout.

This illustration shows the proper way to turn to a two-way street.

This illustration shows the proper way to turn from a one-way street on to a two-way street.
intention to turn left. Move close to the center of the road and turn into the driveway or alley as near as possible to the right side. Stop as the rear of the vehicle clears the curb or edge of the driveway. Check in all directions for traffic, signal a right turn and shift to reverse. When clear, move back slowly while turning the steering wheel quickly all the way to the right. As the vehicle centers in the nearest lane, straighten the wheels, stop, shift to drive, cancel the right signal and move forward.

Three-point turnabout: Use this type of turnabout only when the road or street is too narrow to make a U-turn and you cannot go around the block. This type of turn should only be used on a two-lane roadway.

To perform a three-point turnabout:
- Check the mirrors and activate your right turn signal to communicate your intention to pull off to the right side of the road. Stop on the right side of the road.
- Activate your left turn signal, check traffic and check any blind spots by looking over your left shoulder. When traffic is clear, turn hard left to the other side of the road and stop when you have reached the other side.
- Place the vehicle in reverse, check traffic and check blind spots on both sides by looking over your shoulders. When traffic is clear, turn hard right to the other side of the road and stop.
- Place the vehicle in drive, activate the left turn signal and check traffic and blind spots. When traffic is clear, turn hard left and drive forward into the nearest lane of traffic heading in the new direction. Check traffic and make sure your turn signal has canceled. Continue driving straight in the new direction.

11.5 PARKING
There are several locations where it is forbidden to stop or park a vehicle. Among these are:
- On a crosswalk, sidewalk, bridge, elevated structure, railroad tracks or any controlled access highway.
- Within 30 feet of a traffic signal, stop sign, railroad crossing or within 15 feet of a fire hydrant

PARALLEL PARKING

- Within an intersection, tunnel, runway truck ramp, on/off ramp or blocking a driveway

Parallel parking: Stop even with the car ahead. Turn the wheel sharp right and back slowly toward the car behind. When clear of the car ahead, turn the wheel sharply to the left and back slowly towards the car behind. Turn wheel sharp right and pull towards the curb in the center of the parking space.

When you pull away from the parallel parked position, you should signal, glance in the mirrors, look over your shoulders and pull away when safe. Where parking is permitted, your vehicle must be within 12 inches of the curb or as close as possible to the outside edge of the shoulder, so that traffic will not be impeded.

Leaving the car in low gear if headed uphill and in reverse gear if headed downhill or in park position if your vehicle has automatic transmission. Set the emergency brake and remember to remove the ignition key when leaving the car.

Downhill: When you stop your car headed downhill, turn your front wheels toward the curb. Let your vehicle roll slowly until the front tire rests against the curb using it as a block.

Uphill: When headed uphill at a curb, turn the front wheels away from the curb and let your vehicle roll backwards slowly until the rear part of the front wheel rests against the curb using it as a block.

No curb: When headed uphill with no curb, always turn your front wheels to the right so that if your vehicle moves, it will roll off the highway, not into traffic.

11.6 ENTERING THE FREEWAY
High-speed roadways generally have acceleration ramps so drivers can build up speed. When entering a freeway from an on-ramp, try to increase your speed to match freeway traffic’s pace.

Do not merge into traffic until the solid white line has ended. Do not stop in the acceleration lane unless absolutely necessary. Remember, you must yield the right-of-way to freeway traffic.
- Adjust to freeway speed in the acceleration lane.
- Do not cross the solid white line.
- Signal and move carefully into the freeway lane.

Some freeway entrance ramps have traffic signals which regulate the release of vehicles onto a freeway to allow easier merging and a smoother traffic flow. Motorists on metered ramps will be required to stop and wait to be released on a green light to enter the freeway.

11.6A FREEWAY DRIVING
Freeway driving is different from driving on a regular street or highway mainly because the highways are designed to move a greater volume of traffic at faster speeds.
- Traffic moving at less than the normal speed should always use the right lane.
- To be courteous to vehicles entering the freeway, you should change to the left (or center) lane, if you can do so safely and without slowing the traffic flow.
- Observe the movement of traffic well ahead, around and behind you. Be particularly aware of any vehicles traveling in your blind spots.
- Plan ahead, look for directional signs and guidance signs.

1.6B LEAVING THE FREEWAY
When exiting the freeway, you must use the deceleration lane. This lane is designed to allow you to slow down before reaching the exit ramp without being a hazard to other vehicles on the freeway.

Enter the deceleration lane at approximately the speed you were going on the freeway, then slow down after you have entered the deceleration lane to the advisory speed.
- Do not slow here on the freeway.
- Slow down after turning into the deceleration lane.
- Do not make a last second turnoff.
- Check posted safe speed for exit ramp.

11.7 CHANGING LANES
You must check for possible hazards or vehicles in the lane you want to enter. This means you must check for traffic ahead, to the side and behind your vehicle before you change lanes. Changing lanes includes: changing from one lane to another, passing another vehicle, merging onto a roadway from an entrance ramp, and entering the roadway from the curb or shoulder.
11.8 PASSING

When you see road signs or road markings permit you to pass, you will have to judge whether you have enough room to pass safely. If you do, follow the five steps for changing lanes.

Return to the driving lane when you see both headlights of the other vehicle in your inside rear view mirror, using the five steps for changing lanes. Do not count on having enough time to pass several cars at once. To be safe, as a general rule, only pass one vehicle at a time.

You may pass another vehicle on the right side on a oneway street or on a roadway with two or more lanes of traffic in each direction. At no time shall such pass be made by driving off the pavement of the main traveled portion of the roadway.

Do not pass:
- If you cannot safely return to the right-hand side before coming within 200 feet of an oncoming vehicle, including a bicyclist in the oncoming lane or shoulder.
- If you cannot safely return to the right-hand side before the solid yellow line begins. If passing a bicyclist you can briefly cross a solid yellow when there is no oncoming traffic and you have a clear view ahead.
- On a curve or hill where your view is obstructed.
- Within 100 feet of a marked or unmarked intersection, or railroad crossing.
- Within 100 feet of any bridge, viaduct, or tunnel when view is obstructed.
- A bicyclist unless you can allow a minimum three-foot buffer zone between your vehicle, including mirrors, and the bicyclist.

Following Too Closely (C.R.S. 42-4-1008(1)):

"The driver of a motor vehicle shall not follow another vehicle more closely than is reasonable and prudent, having due regard for the speed of such vehicles and the road upon which the condition of the highway."
11.14 CONSTRUCTION ZONES
Every year drivers face highway construction and maintenance projects, which are designed to improve the efficiency and safety of our transportation system. These projects can sometimes involve lane closures during the day and night, which may change your driving habits and require additional attention.

It is important that you become a defensive driver. Defensive driving is driving to protect yourself and others from dangerous and unexpected driving situations as well as everyday driving.

12.1 STEERING
Keep both hands on the steering wheel. The two most effective positions are nine o'clock and three o'clock, and eight o'clock and four o'clock for vehicles with airbags. When turning corners, use the “hand-over-hand” or grip and release method. Do not turn the wheel with the palm of your hand. Letting the wheel slip through your fingers could be dangerous.

12.2 SCANNING
As a driver you must know what is happening around your vehicle. You must look ahead, to the sides, and behind the vehicle. Always look left, right and left again when turning, driving through or entering an intersection. Scanning helps you to see problems ahead, vehicles and people that may be in the road, or on the shoulder by the time you reach them, and warning signs of problems ahead and signs giving you directions.

Look ahead: In order to avoid last-minute braking or the need to turn abruptly, you should look down the road at least 10 seconds ahead of your vehicle (City — one block, Open road — half a mile). By looking well ahead and being ready to stop or change lanes if needed, you can drive more safely, save on fuel and help keep traffic moving at a steady pace.

Look to the sides: As other vehicles or pedestrians may enter your path at anytime, you should look to both sides to watch for potential trouble.

Look behind: You must check traffic behind you. This is the only way to know if someone is following too closely or coming up too quickly, and it will give you time to do something about it. You need to check more often when traffic is heavy. It is very important to look behind you when you change lanes, slow down, back up, exit an intersection or drive down a long or steep hill.

12.3 FOLLOWING ANOTHER VEHICLE
Three-second rule: Under normal conditions, use the three-second rule. Watch the car ahead of you; when it passes a reference point (such as a mile marker, sign or telephone pole) then count “one-thousand-one, one-thousand-two, one-thousand-three.” If you pass the reference point before you finish counting, you are following too closely. It is important to consider weather, road conditions, the amount of traffic and time of day. If the road is slick, the stopping distance required is greatly increased.

12.4 ADJUSTING TO TRAFFIC
Keep pace with traffic in a reasonable and prudent manner. If you are going faster than traffic, you will have to keep going until you pass someone or there is a chance for collision. Driving considerably slower than other vehicles can be just as risky as speeding. Driving too slowly can make vehicles bunch up behind you and causes other traffic to pass you. Remember to obey all posted speed limits.

12.5 TROUBLE SPOTS
Where people or traffic gather, your time and room to maneuver is limited. These areas require slower speeds and increased observation:

- Shopping centers
- Rush hour traffic
- Schools
- Narrow bridges
- Playgrounds
- Toll plazas
- Residential streets

13. SHARING THE ROAD
Sharing the road means getting along, not ahead. A courteous, alert and knowledgeable driver will make the highways safer for all. A loaded truck with good tires and properly adjusted brakes traveling at 55 mph on a clear, dry roadway requires a minimum of 290 feet to come to a complete stop.

Trucks/buses require more room than automobiles to execute turns, make lane changes and other driving maneuvers. Trucks/buses have blind spots called No Zones, which are areas around trucks/buses where cars either disappear into blind spots or are so close that they restrict the truck or bus driver’s ability to stop or maneuver safely. Both types of No Zones greatly increase the potential for a crash.

Points to remember:
- Backing: Do not pass or stop close to a truck/bus preparing to or is backing up, as the trailer will hide objects in the No Zone.
- Passing: Maintain a constant speed when passing and reentering the lane of traffic in front of trucks or buses, since they require longer distances to slow down than cars. Do not pull in front of a truck or bus until you see the entire front of the vehicle.
- Rear blind spots: Trucks/buses have large blind spots behind them. If you tailgate, not only do you make it impossible for the driver to see you, but you also cut off your own view of traffic.
- Side blind spots: Trucks/buses have much larger blind spots on both sides than cars. If the truck or bus driver needs to make an emergency maneuver or change lanes they will not be able to see you and a collision could result.
- Wide turns: Because of their size trucks/buses often need to move to the left lane to make tight turns. Cutting in between the truck/ bus and the curb or shoulder increases the possibility of a collision.

13.2 RAILROAD CROSSING
When approaching a railroad crossing, be cautious because a train can arrive at any time, day or night. Obey all warning devices, lights, gates and signs. Do not drive onto a crossing until you are sure the tracks are clear, especially when there are multiple tracks. There may be a second train.

Do not misjudge the train’s speed and distance. Because of its large size, a train appears to be moving much slower than you think. The average freight train traveling at 55 mph requires approximately one mile to stop.

Advance warning signs: A railroad crossing is ahead. The warning sign is at a sufficient distance to allow you to stop (if necessary) before reaching the crossing.

Pavement markings: Consists of an “X” and a “stop” and may be painted on the pavement in front of a crossing. Always stay behind the painted stop line while waiting for a passing train.

Quiet Zone signs: Crossings in designated quiet zones will have a “Train Horn” sign posted below the Advance Warning signs. Train horns do not blow at these crossings. The flashing lights and gates warn you of an approaching train.
13.3 LIGHT RAIL

In some areas, LRVs will operate on streets in the downtown Denver area. Light rail service will extend to the University of Colorado Denver, Auraria Campus, and the Health Sciences Center. LRVs will operate in the opposite direction from other traffic. The LRVs will be governed by all traffic signals and signs when operating on the streets.

Driver safety tips:

- Never turn in front of an approaching LRV.
- Never turn across a set of light rail tracks without checking in all directions.
- Watch for people getting on and off a stopped LRV.
- Be especially alert in light rail areas as nearby buildings and foliage can make it difficult for motorists to see them.

The light rail crossing areas for motorists can have regular traffic signals. Some have warning lights and some have gates with railroad type traffic arms. All these signals mean the same thing: Stop! Do not cross the tracks.

Never drive around traffic gates, even if a LRV has just passed. Another vehicle may be coming from the other direction.

Be aware of your vehicle height. Overhead wires are a standard height of 18 feet, 6 inches above the center of the tracks. Always assume a wire hanging from the overhead catenary is electrified so never touch the wire or anything it is touching.

Pay particular attention to these special traffic warning signs in connection with light rail:

If you find a wire hanging from the overhead or if you think any safety devices are malfunctioning, please call RTD at 303-299-6000 and report the problem.

13.4 SCHOOL BUSES

It is unlawful to:

- Park in any marked no-parking zones.
- Exceed the posted speed limit when passing.

- Pass a school bus with flashing red lights and stop arm extended.
- Pass within 100 feet of any intersection.
- Within 100 feet of any railroad crossing.
- Park on any hill, curve or bridge where vision is obstructed.

Always be alert for students on or near the roadway when a school bus is stopped.

If a school bus is displaying alternating flashing red light signals, visible from the front or rear you must stop immediately before reaching the bus. Do not proceed until the flashing red lights stop. If you are traveling on a divided highway having four or more lanes with a median separating the traffic, it is only necessary for the vehicles traveling in both lanes behind the school bus to stop, and not the traffic traveling in the opposite direction.

If you are traveling on a two-lane roadway, traffic in both directions are required to stop. If you are traveling on a four-lane roadway without a median, traffic in both directions are required to stop.

If you are traveling on a highway having more than four lanes with a divided center turn lane, it is only required for the vehicle in both lanes behind the school bus to come to a complete stop.

Vehicles traveling in the opposite direction are not legally required to stop.

Violating school bus traffic laws is considered a class-one or class-two misdemeanor offense. Drivers can be fined up to $300, with a mandatory court appearance and six points on a driver’s license. A second offense within a five-year period has a fine up to $1,000, plus six points on the driver’s license.

Overhead Amber Warning Lights:

When a school bus is about to stop and load or unload children, the bus driver activates amber warning lights. The amber warning lights will stay on until the bus door opens.

Overhead Red STOP Lights/STOP Arm: When the bus driver opens the bus door, the red STOP lights and STOP arm activates. Stop and remain stopped until the bus driver retracts the stop arm and deactivates the red warning lights. Vehicles must stop less than 20 feet from the front or rear bumper of the school bus.

You Must Stop: Not stopping when approaching or overtaking a school bus which has stop lights on and the stop arm extended is unlawful.

CAUTION: Motorists should use extreme care when near a stopped school bus because children are likely to dart from the bus’s front or rear.

13.5 BICYCLES AND MOTORCYCLES

Motorists must lookout for cyclists and anticipate their sudden and unexpected moves.

A share-the-road attitude is the best policy to promote safe highways in Colorado.

The most common motorist-caused car-bicycle or car-motorcycle collision is a motorist turning left in front of an oncoming bicycle or motorcycle. Drivers may fail to see cyclists or a driver may fail to judge the speed of oncoming cyclists. As a driver, remember to look for cyclists at the right side of the lane or on the shoulder and then look again. Make sure you see the cyclist and know their speed before you make your left turn.

Bicycles travel in the same direction as motor vehicles and are entitled to the full lane when traveling at the normal speed of traffic. Bicycles are “vehicles” under state law. Per C.R.S. 42-4-1412, bicyclists have the same rights and responsibilities to follow all rules, signs and markings that motor vehicles are required to obey. Similar to pedestrians, bicyclists have the potential to be seriously injured or struck by a motorized vehicle. Complying with the laws impacting their movement helps everyone be safer on the road.

- Use a multi-lane, one-way street, know that a bicyclist can ride to the right or the left side of the roadway.
- Don’t startle a bicyclist by honking your horn.
Bicyclists may ride two abreast as long as they are not impeding the normal and reasonable movement of traffic.
• While turning at a red light, come to a complete stop and look for bicyclists approaching from behind or next to your vehicle; making a left turn from the opposite side of the street; or part of the oncoming traffic.
• Before opening your car door, look for oncoming bicyclists to avoid hitting them.
• Stay out of bike lanes turning, entering or leaving another road, driveway or alley.
• Impeding bicycle traffic in bike lanes forces bicyclists to ride into the travel lanes which can cause collisions.
• Only pass a bicyclist if you are able to give at least three feet clear space between the farthest edge of your vehicle and the bicyclist. If you are unable to give three feet, slow down and remain behind the bicyclist until it is safe to pass. Motorists can cross a center line when passing a bicyclist if the oncoming lane is clear and they don’t interfere with any other traffic.
• Be aware that bicyclists may ride in the center of the travel lanes for visibility and safety when the road is too narrow for bikes and cars to ride safely side by side, or when they’re dodging obstacles such as opening car doors, broken glass, drainage grates and obstacles on the road.
• Look for bicycle hand signals while driving near a bicyclist. The hand signals are as follows:
  • Right hand raised and held straight out to the right, or left arm straight out and bent upward at the elbow.
  • Left turn – Left arm extended out to the left. Stopping or stopping – Left arm straight out and bent downward at the elbow.

Motorcycles
Motorcycles are entitled to the same full lane and width as other vehicles. Motorcyclists constantly change position within their lane so they can be seen, be aware of other road users and avoid road hazards. When passing a row of parked vehicles, use extra caution when driving around either and increase your following distance.

Avoiding Collisions: Drivers of vehicles can help to prevent collisions with bicyclists by knowing the most common causes of motorist-bicyclist collisions and how to avoid them. Five common errors that can cause a motorist-bicyclist collision include:

<table>
<thead>
<tr>
<th>Cause of collision</th>
<th>How to prevent</th>
</tr>
</thead>
<tbody>
<tr>
<td>Motorist turning left in front of an oncoming bicyclist</td>
<td>Look for oncoming bicyclists riding on the shoulder or edge of the road before turning</td>
</tr>
<tr>
<td>Motorist or bicyclist running a stop sign or stop signal</td>
<td>Stop first, then proceed into intersection yielding to other drivers</td>
</tr>
<tr>
<td>Motorist opening a vehicle door without looking behind for a passing bicyclist</td>
<td>Always check behind you before opening a door into the roadway</td>
</tr>
<tr>
<td>Bicyclist riding the wrong way against traffic, toward the motorist</td>
<td>Ride bicycles in the same direction as traffic</td>
</tr>
<tr>
<td>Motorist pulling out from a driveway and failing to see a bicyclist on road or sidewalk</td>
<td>Check both directions when crossing a sidewalk, bike path, or road</td>
</tr>
</tbody>
</table>

Though bicycles travel in the same direction as motor vehicles, they are generally moving more slowly and usually travel to the right of the right lane, on the shoulder or in a bike lane.

Exceptions include: making left turns, when a right turn lane is present and the cyclist is traveling straight through, or when the right of a lane has hazards or debris that the bicyclist must avoid.

Motorists must be aware that bicyclists, like pedestrians, are more vulnerable users of the public roads and they may change positions in the road to avoid road hazards. Also, be aware that strong winds can unexpectedly move a bicyclist into a different position on the road.

Bicyclists displaying these behaviors.

13.6 PEDESTRIANS
Pedestrians are the most vulnerable users of our roadways. They are people who are standing, walking, running, using a cane or wheelchair on public streets, highways, and private property. As a driver, it is your responsibility to watch for pedestrians on your route. People on foot are a heavy object that can cause serious injuries or death. Pedestrians have the right-of-way at all intersections and crosswalks. Drivers must come to a complete stop and let the person pass safely.

• When exiting your car, look for pedestrians that may be approaching the side of the vehicle.
• Yield to pedestrians crossing at intersections and crosswalks whether the crosswalk is marked or not.
• Look for pedestrians at all intersections, especially if you are making a right or left turn.
• While turning at a complete stop, make sure you are in the correct lane and come to a complete stop. Check for pedestrians and traffic in all directions to make sure your path is clear.

• Do not stop with any portion of your vehicle overhanging the cross walk area.
• Watch for pedestrians entering or exiting their cars while passing parked vehicles. Drive extra cautiously around schools, parks, parking lots, and special events where pedestrians are likely to be present.
• Never pass vehicles stopped at a crosswalk as the driver may be stopping for pedestrians that you can’t see.
• Check blind spots and mirrors while backing your car out of a parking space or driveway.

13.7 CARELESS/RECKLESS DRIVING
Sharing the road is important not only for your safety and the safety of others, it is the law.
13.8 AGGRESSIVE DRIVING
Aggressive driving or reckless driving is defined as any behavior that places others and/or property in danger through willful action without regard to safety. Aggressive vs. reckless: Driving assertively to enter a freeway lane does not protect you from another motorist encroaching on your lane is acceptable, but at what point does assertive driving become aggressive or reckless? The line is defined by your intent as a motorist.
• If a law enforcement officer notes your actions as endangering another or property (including the other motorist’s vehicle) you can be charged under Colorado’s reckless driving statute (18-3-103.1) and if convicted, up to eight points can be assessed against your driving record.
  • A single act, such as tailgating another driver, passing on the shoulder or making a wrong turn could be seen by a law enforcement officer as aggressive if the officer believes the action is willful and places others in danger. A combination of acts, such as speeding, cutting off other vehicles, swerving toward another motorist, honking, flashing headlights, yelling and using inappropriate hand gestures can also be considered aggressive driving.
  • Activities, such as waving a weapon at another motorist, bumping or ramming another vehicle or high speed pursuit of a vehicle can result in criminal charges beyond a reckless driving charge.
  • Protecting yourself from aggressive drivers: To protect yourself from an aggressive driver, don’t engage with that driver.

14. THE DRIVE TEST
Drive tests are by appointment only Colorado driver license offices. Generally, Mondays, Fridays and days after holidays are the busiest. To allow for sufficient time to complete the drive test and any processing, the last appointment for a drive test is at 4 p.m. at those offices with 8 a.m. to 5 p.m. hours of operation. Appointments are scheduled close together. You must be on time. If you are late for your appointment, you will have to reschedule. Not all driver license offices offer drive tests. Check the list of offices at Colorado.gov/DMV/driver-licensure-office-locations.

The drive test will be given in a legally licensed vehicle you provide. You must show evidence of insurance and registration for that vehicle. The examiner will check the vehicle for safety including brake lights, turn signals, seat belts, the windshield and tires. Examiners will also check whether the vehicle’s doors and windows open from inside the vehicle. Safety regulations only the driver and the examiner are allowed in the vehicle during the test. The drive test measures your skill and knowledge of legal and safe driving practices. You will not be tricked or asked to determine whether you have a greater potential to become aggressive behind the wheel. Take a few minutes to ask yourself some questions, and be honest with yourself. Do you:
• Mentally condemn other drivers as incompetent or stupid?
• Make negative comments about other drivers to those riding with you?
• Close up space to other motorists from merging or changing lanes?
• Switch lanes from behind another driver?
• Tailgate a driver to get them to speed up or get out of your way?
• Angrily speed past another driver?
• Red light stop, red light or other traffic control device out of frustration or anger?
• Honk or yell at someone to express your anger or frustration?
• Make an obscene gesture at another driver?
• Pursue another vehicle to express your anger?
• Deliberately bump or ram another vehicle?
• Ever drive your vehicle to teach the other driver a lesson through either a verbal exchange or physical confrontation?
• Fantasize about physically attacking another driver?

If you answered yes to any of these questions, even just a couple, you may be at risk to become an aggressive driver. How do you avoid becoming an aggressive driver? Leave early for any trip. Too frequently people don’t allow enough time to get where they want on time! Play music that you like, but don’t get so loud that you can’t hear emergency vehicles. Keep cool. Don’t transfer the anger you may feel from other situations into your driving. Let people merge, even if they’ve done something wrong. Why make their problem your problem?
15.4 ACCIDENTS
In the event of an accident you should:
• Stop immediately
• Check for injuries and where practical render reasonable assistance
• Call the police and emergency personnel.
Exchange names, addresses, phone, registration and insurance information
If under accident status: If alcohol and drugs are not involved, there are no injuries and all vehicles are still there is no room to the front of you to get out of danger. Be sure to slow down once the danger has passed.

15.2 BRAKE FAILURE
Pump the brake pedal several times. This will often build up enough brake pressure to allow you to stop. If that does not work, use the parking brake. Pull on the parking brake handle slowly so you will not lock the rear wheels and cause a skid. Be ready to release the brake if the vehicle starts to skid. If that does not work, shift to lower gears and look for a safe place to slow to a stop. Make sure the car is off the roadway. Don’t drive the vehicle without brakes.

15.2B TIRE BLOWOUT
Hold the steering wheel tightly, and keep the vehicle going straight. Slow gradually. Take your foot off the accelerator, steer straight ahead, straddling the pavement edge, until the car has almost stopped. Then turn and guide your car back onto the road.

15.3 ANIMALS
There may be occasions when an animal suddenly runs in front of your vehicle. Small animals such as rabbits, dogs or cats seldom cause severe property damage to vehicles, but present a hazard if a motorist takes evasive action that results in losing control of the vehicle.
Big game animals, mostly deer, are large enough to cause damage to a motor vehicle. However, the size of these animals may cause the motorist to take drastic evasive action to prevent a collision. This may result in a more serious crash than if the vehicle collided with the animal. Regrettably, the safest alternative may be hitting the animal. Concentrate on retaining control of the vehicle before, during, and after the collision with the animal.
About 90% of deer-vehicle crashes occur between dusk and dawn throughout the year. Big game animals can appear in metropolitan areas as well as mountainous regions. If there are animals near the roadway, slow down and proceed with extreme caution.

15.2D HEADLIGHT FAILURE
Try the headlight switch a few times. If that does not work, put on the emergency flashers, turn signals or fog lights. Do not stop off the road as soon as possible. Simply stop off the road. At night, drive with your lights on. Do not drive the vehicle without lights.

15.2E JAMMED GAS PEDAL
Try the headlight switch a few times. If that does not work, put on the emergency flashers, turn signals or fog lights. Do not stop off the road as soon as possible. Simply stop off the road. At night, drive with your lights on. Do not drive the vehicle without lights.

15.3A ANIMALS
Before you begin the test you must make sure that you are ready. Do not wait to the last minute to get ready. The test is designed to measure your ability to drive safely and effectively.

15.2C POWER FAILURE
Hold the steering wheel tightly, and keep the vehicle going straight. Slow gradually. Take your foot off the accelerator, steer straight ahead, straddling the pavement edge, until the car has almost stopped. Then turn and guide your car back onto the road.

15.2A BRAKE FAILURE
Pump the brake pedal several times. This will often build up enough brake pressure to allow you to stop. If that does not work, use the parking brake. Pull on the parking brake handle slowly so you will not lock the rear wheels and cause a skid. Be ready to release the brake if the vehicle starts to skid. If that does not work, shift to lower gears and look for a safe place to slow to a stop. Make sure the car is off the roadway. Don’t drive the vehicle without brakes.

15.2B TIRE BLOWOUT
Hold the steering wheel tightly, and keep the vehicle going straight. Slow gradually. Take your foot off the accelerator, steer straight ahead, straddling the pavement edge, until the car has almost stopped. Then turn and guide your car back onto the road.

15.3 ANIMALS
There may be occasions when an animal suddenly runs in front of your vehicle. Small animals such as rabbits, dogs or cats seldom cause severe property damage to vehicles, but present a hazard if a motorist takes evasive action that results in losing control of the vehicle.
Big game animals, mostly deer, are large enough to cause damage to a motor vehicle. However, the size of these animals may cause the motorist to take drastic evasive action to prevent a collision. This may result in a more serious crash than if the vehicle collided with the animal. Regrettably, the safest alternative may be hitting the animal. Concentrate on retaining control of the vehicle before, during, and after the collision with the animal.
About 90% of deer-vehicle crashes occur between dusk and dawn throughout the year. Big game animals can appear in metropolitan areas as well as mountainous regions. If there are animals near the roadway, slow down and proceed with extreme caution.

15.4 ACCIDENTS
In the event of an accident you should:
• Stop immediately
• Check for injuries and where practical render reasonable assistance
• Call the police and emergency personnel.
Exchange names, addresses, phone, registration and insurance information
If under accident status: If alcohol and drugs are not involved, there are no injuries and all vehicles are still there is no room to the front of you to get out of danger. Be sure to slow down once the danger has passed.

15.2 BRAKE FAILURE
Pump the brake pedal several times. This will often build up enough brake pressure to allow you to stop. If that does not work, use the parking brake. Pull on the parking brake handle slowly so you will not lock the rear wheels and cause a skid. Be ready to release the brake if the vehicle starts to skid. If that does not work, shift to lower gears and look for a safe place to slow to a stop. Make sure the car is off the roadway. Don’t drive the vehicle without brakes.

15.2B TIRE BLOWOUT
Hold the steering wheel tightly, and keep the vehicle going straight. Slow gradually. Take your foot off the accelerator, steer straight ahead, straddling the pavement edge, until the car has almost stopped. Then turn and guide your car back onto the road.

15.3 ANIMALS
There may be occasions when an animal suddenly runs in front of your vehicle. Small animals such as rabbits, dogs or cats seldom cause severe property damage to vehicles, but present a hazard if a motorist takes evasive action that results in losing control of the vehicle.
Big game animals, mostly deer, are large enough to cause damage to a motor vehicle. However, the size of these animals may cause the motorist to take drastic evasive action to prevent a collision. This may result in a more serious crash than if the vehicle collided with the animal. Regrettably, the safest alternative may be hitting the animal. Concentrate on retaining control of the vehicle before, during, and after the collision with the animal.
About 90% of deer-vehicle crashes occur between dusk and dawn throughout the year. Big game animals can appear in metropolitan areas as well as mountainous regions. If there are animals near the roadway, slow down and proceed with extreme caution.

15.4 ACCIDENTS
In the event of an accident you should:
• Stop immediately
• Check for injuries and where practical render reasonable assistance
• Call the police and emergency personnel.
Exchange names, addresses, phone, registration and insurance information
If under accident status: If alcohol and drugs are not involved, there are no injuries and all vehicles are still
Saying Yes to Donation
Can Save a Life Like Connor’s.

Connor was just 13 when he received his new heart thanks to his heroic donor. Say yes to organ, eye and tissue donation and discuss your decision with your family.

Donate Life Colorado Organ and Tissue Donor Registry: People who choose to become organ, eye and tissue donors see it as a way to make a difference in the world. They say it feels good to know they can help others. Currently, in Colorado, there are thousands waiting for life-saving organ transplants. You can make a difference by saying “yes” and joining the Donate Life Colorado Organ and Tissue Donor Registry.

When applying for or renewing a Colorado driver license, Instruction Permit or ID card, you will be asked two important questions regarding organ and tissue donation.

Would you like to register as an organ, eye and tissue donor?
If you say yes, a greyscale heart with a “Y” will appear on the front of your license, permit or ID card. Your name will automatically be added to the Donate Life Colorado Registry. Being in the Donor Registry means you have elected to have all of your organs and tissues made available for transplant at the time of your death. Joining the registry not only documents your decision to save lives by becoming an organ, eye and tissue donor, it relieves your family of having to make the donation decision on your behalf.

The registry is managed by Donor Alliance, a non-profit, federally-designated organ and tissue recovery agency, and is accessible only to authorized donation personnel.

Consider these facts about donation:
• One donor can save the lives of up to 8 people, and heal up to 50 others
• People of all ages and medical histories can be donors — even those with diabetes or hepatitis C
• There is no cost to the donor or donor family related to donation
• All major religions support organ and tissue donation
• An open casket remains an option

Organ and tissue recovery happens only after all life-saving efforts have been exhausted and death has been legally declared.

Sign up or remove your name from the Donor Registry by visiting www.DonateLifeColorado.org or by calling 303-324-4747 or 888-868-4747.

Would you like to contribute a dollar or more to the Emily Maureen Ellen Keyes Organ and Tissue Donation Awareness Fund? Another way for you to support organ and tissue donation is to make a voluntary contribution to the Emily Maureen Ellen Keyes Organ and Tissue Donation Awareness Fund. The fund was created in 1996 by the Colorado State Legislature to increase organ and tissue donation in Colorado. Your contributions to the fund go directly to public outreach and education surrounding organ, eye and tissue donation. Information brochures are at all Colorado driver license offices. For more information, call 303-324-4747 or 888-868-4747 or visit www.donoralliance.org.

Colorado’s Move Over law protects law enforcement, fire, maintenance, other emergency personnel and you.

15.5 FIRST AID
Good Samaritan laws were developed to encourage people to help others in emergency situations. They require the “Good Samaritan use common sense and a reasonable level of skill, not to exceed the scope of the individual’s training in emergency situations.” They assume each person would do his or her best to save a life or prevent further injury.

When people respond to an emergency and act as a reasonable and prudent person would under the same conditions, Good Samaritan immunity generally prevails. This legal immunity protects you, as a rescuer, from being sued and found legally responsible for the victim’s injury. For example, a reasonable and prudent person would:
• Move a victim only if the victim’s life was endangered
• Check the victim for life-threatening emergencies before providing further care
• Summon professional help to the scene by calling the local emergency number or the operator
• Continue to provide care until more highly trained personnel arrive

Never 2,000 people in Colorado are waiting for a lifesaving organ transplant.
Every 10 minutes someone is added to the national transplant waiting list.
Just one donor can save up to eight lives through organ donation and save and heal more than 75 lives through eye and tissue donation.

Your decision to be a donor will not affect medical care. Doctors and nurses caring for you before death are not involved in the donation process.
Anyone - regardless of age or medical condition - can register as a donor. Patients with chronic conditions such as diabetes and hepatitis can potentially save and heal lives through donation.

Six lives have been saved through the Donate Life Colorado Organ and Tissue Donor Registry. 4,258 people in Colorado have joined the Donate Life Colorado Organ and Tissue Donor Registry: 2,578 have joined because of a family member's donation, 1,651 have joined because of a friend's donation.

Your Organ Donation Information: 2,578 people in Colorado have joined the Donate Life Colorado Organ and Tissue Donor Registry: 2,578 have joined because of a family member’s donation, 1,651 have joined because of a friend’s donation.

Donors see it as a way to make a difference in the world. They say it feels good to know they can help others. Currently, in Colorado, there are thousands waiting for life-saving organ transplants. You can make a difference by saying “yes” and joining the Donate Life Colorado Organ and Tissue Donor Registry.

When applying for or renewing a Colorado driver license, Instruction Permit or ID card, you will be asked two important questions regarding organ and tissue donation.

Would you like to register as an organ, eye and tissue donor?
If you say yes, a greyscale heart with a “Y” will appear on the front of your license, permit or ID card. Your name will automatically be added to the Donate Life Colorado Registry. Being in the Donor Registry means you have elected to have all of your organs and tissues made available for transplant at the time of your death. Joining the registry not only documents your decision to save lives by becoming an organ, eye and tissue donor, it relieves your family of having to make the donation decision on your behalf.

The registry is managed by Donor Alliance, a non-profit, federally-designated organ and tissue recovery agency, and is accessible only to authorized donation personnel.

Consider these facts about donation:
• One donor can save the lives of up to 8 people, and heal up to 50 others
• People of all ages and medical histories can be donors – even those with diabetes or hepatitis C
• There is no cost to the donor or donor family related to donation
• All major religions support organ and tissue donation
• An open casket remains an option

Organ and tissue recovery happens only after all life-saving efforts have been exhausted and death has been legally declared.

Sign up or remove your name from the Donor Registry by visiting www.DonateLifeColorado.org or by calling 303-324-4747 or 888-868-4747.

### DRIVE TIME LOG SHEET

**Student’s name:**

**Permit number:**

Your instruction permit:

If you are under 18, you must comply with the following requirements:

- You must be 16 years of age to be issued an instruction permit unless you have completed and passed the classroom portion of an approved driver education course then you may be issued an instruction permit at the age of 15 years. You must submit proof of completion, along with your identification, at the time you apply for the permit.
- Or, if you have completed a State-approved 4-hour driver awareness course, then you may be issued a permit at 15 years/6 months. You must submit proof of completion, along with your identification, at the time you apply for the permit.

You are required to hold your first instruction permit for at least twelve months and be at least 16 years of age before you can get a driver license in Colorado. This means that if you get your permit on your 15th birthday, you will have to hold the permit until your 16th birthday before you can apply for the license.

You are required, by law, to complete behind-the-wheel training before you can be issued your driver license if you are under the age of 16 years, 6 months at the time you apply for your driver license. The BTW training can be administered two ways: you can take 6 hours with a driving instructor from a department-approved school or, if there isn’t a driving school that offers BTW training at least 20 hours per week with an address that is within 30 miles of the permit holder’s residence, you may complete 12 hours with a parent, guardian or alternate permit supervisor.

At the time you apply for your driver license, you are also required, by law, to submit a log of your driving experience. The log sheet must show a minimum total of 50 hours, with 10 hours of those 50 hours having been driven at night. The Drive Time Log Sheet is used any time you drive. The appropriate box is filled in by the parent/guardian of a driving school that offers BTW training at least 20 hours per week with an address that is within 30 miles of the permit holder’s residence, you may complete 12 hours with a parent, guardian or alternate permit supervisor.

They will fill in the date, the total drive time, the amount of night driving (if any) and their initials. The comments section is optional for licensing purposes, but is useful for you to track your progress.

The Driver Time Log Sheet is the only log sheet acceptable as proof of the required 50 hours of driving time unless the log sheet you are presenting is from a state-approved Commercial Driving School, Driver Education or 3rd-party testing organization. The 50-hour total may include your 6-hour BTW training, if your BTW training was with your Driver education teacher. If you complete 12 hours of BTSW training with your parent/guardian/alternate permit supervisor, the 12 hours is IN ADDITION to the 50-hour requirement of the log sheet, for a total of 62 hours. You may make photocopies of the log sheet if you need more than one to complete your 50 hours.

When you have reached your required totals, your parent, stepparent, guardian or grandparent with Power of Attorney (the same person that signed the DR 2420, Affidavit of Liability and Guardianship, for you to get your permit) or your driver education instructor must then verify total driving time and total night driving time on your log sheet(s).

These totals are entered on the appropriate lines on the back of the last log sheet. The parent/guardian or driver education instructor will then sign and date only the back of the log sheet that has the final completed totals.

Once you have held your instruction permit for at least 12 full months, and you are at least 16 years of age, you are eligible to apply for your license. You will need to bring the completed original Drive Time Log Sheet(s) with you when you come in.

You must submit the completed Drive Time Log Sheet at the time you apply for your license. If your parent/guardian/alternate permit supervisor administered the required behind-the-wheel training, they will complete the back of a DR 2460, the Affidavit of Completion of a Driver Education Classroom Course or BTW. Reminder, drive tests at driver license offices are by appointment, only.

Your driver license: When you are issued your driver license, if you are under the age of 18, there are still a few things you need to be aware of. The law does not allow you to carry a passenger under the age of 21 until you have held your license for at least 6 months. And, you can’t carry more than one passenger under 21 until you’ve held your license for at least one year. The exceptions to this are if your parent/guardian is with you, or there is an adult passenger 21 or older who has a valid license and has held that license for at least one year, or the passenger under 21 needs emergency medical assistance or is a member of your immediate family.

While you are under 18, you cannot drive between the hours of 12:00 midnight and 5:00 a.m. unless you have held your license for at least one year. The exceptions to this are if your parent/guardian is with you, or there is an adult passenger 21 or older who has a valid license and has held that license for at least one year, or it is an emancipated minor with a valid license. You may drive between midnight and 5:00 a.m. if it’s to a school or school-authorized activity where the school doesn’t provide transportation. You will need a signed statement from the school official showing the date of the activity. And, you may drive between midnight and 5:00 a.m., if it’s to and from work. You must carry a signed statement from your employer verifying your employment.

While you are under the age of 18, when you carry any allowed passengers, everyone riding with you must wear their seat belt. Only one passenger can ride in the front seat with you. You can only carry as many passengers in the back seat as there are seat belts.

Colorado law prohibits drivers under 18 years age from using a cell or mobile phone while driving unless it is to contact the police or fire department or it is an emergency. Drivers 18 and older may not use a cell or mobile phone while driving unless it is to contact the police or fire department or it is an emergency. Your license expires 20 days after your 21st birthday.

Have a safe journey and we will see you when you turn 21.
Affidavit of Liability and Guardianship  
(C.R.S. 42-2-108 and 42-2-109)  
(Must be signed in the presence of a Motor Vehicle Employee or Notary Public)

I understand by signing this form I assume liabilities of the above minor driving a motor vehicle, and I understand my signature may be withdrawn upon written request and the minor’s license / permit will be cancelled. By signing this form I attest that I hold a valid Colorado Driver License and I am 21 years of age or older. In the event that I do not hold a valid Colorado Driver License, I appoint the Alternative Permit Supervisor designated below who holds a valid Colorado Driver License and is 21 years of age or older to supervise the minor while learning to drive. Additionally, I am aware that I am the only person who is responsible to sign the drive time log sheets for this minor.

Printed Name and Signature of Person Assuming Liability  
ID Type and No.

By signing this form, I give my consent as Parent / Guardian for the above named Minor to be designated as an Organ/Tissue Donor.  
☐ Yes  ☐ No

Motor Vehicle Employee  
Date (MM/DD/YY)

Notary Public  
Notary Seal

Subscribed and sworn before me this _________ day of _________________, 20 ___.

In the State of Colorado, County of ___________. My commission expires ________.

Court or Power of Attorney documents presented: _____________________________.

Signature of Notary Public _______________________________________________

Alternative Permit Supervisor

I appoint the Alternative Permit Supervisor designated below, with a valid Colorado Driver License and am 21 years of age or older to supervise the minor while they are learning to drive.

First Name Last Name  
CO Customer Identification Number (DL#)

By signing, I attest that I have a valid Colorado Driver's License.

Signature of Alternative Permit Supervisor  
Date (MM/DD/YY)
